

Hosted IP PBX

Hosted PBX is a smart, cost-effective alternative to traditional business phone systems. With Hosted PBX, there are no on-site hardware requirements (no PBX to purchase or maintain) because Nextera provides all the functionality of a traditional PBX on a managed, centralized platform. This means businesses benefit from minimal start-up costs and reduced Total Cost of Ownership and pay-as-you-grow — which means you save money without sacrificing features. Hosted PBX is a complete turnkey system that combines broadband connectivity with local and long distance service and a host of advanced features (see listing below). The service plans are flexible and completely scalable for business customers of every size. Add Internet access via Nextera’s T-1 (Wired or WiMax Wireless) or DSL for a complete managed service for increased efficiency.

Lower Cost & Operating Expenses

Improve your bottom line by lowering your initial and operating costs using Nextera’s Hosted IP PBX.

- No PBX to buy, lease, maintain or upgrade
- One vendor for all your voice and data needs
- No obsolescence — Nextera will upgrade software and features so you don’t have to
- Scalable — Grows incrementally as your business grows
- Dynamic bandwidth — Dynamically allocated voice and data

Increase Productivity

Innovative features dramatically improve productivity such as:

- UCM (Unified Call Messaging) — Receive voicemail, fax and email in single or multiple locations.
- Find Me, Follow Me — A single contact phone number no matter where you are
- Conference Calling — Communication with remote offices and employees
- MyNextera Web Portal — Allows configuration of features and functionality online

Hosted PBX *continued*

Geographic Independence

Collaborate easily with remote employees and customers by using:

- Remote phones — Link remote employees and offices to your corporate office
- Free Calling & 4-Digit Dialing — Between remote offices and employees
- Virtual Phone Number (VPN) — Expand your geographical presence by adding a VPN

Enhanced Image

Give your business the “big business” image by using:

- Music on Hold — Generic or Customized Music on Hold
- Auto Attendant — Dial by name or department
- HD Voice — Experience High Definition Voice Services

Nextera’s Hosted PBX Enhanced Features provide flexibility for your call-answering functionality, such as:

- **Attendant Console** — Receptionist answers all calls, can see who is on the phone and transfer calls.
- **Multiple Access Directory Numbers (MADN)** — Lines appear on multiple phones allowing small teams and departments to answer inbound calls and handle appropriately.
- **Auto Attendant** — Ensures effective call handling and projects a professional image by allowing customers to dial by name or department, routing calls appropriately. It can be adjusted by time of day, or enabled during closed hours.
- **Direct Inward Dialing** — Spend less time transferring and answering calls by assigning a DID to each employee, allowing customers to direct-dial employees and departments.

Nextera’s Free HPBX Features
